ABOUT ME

Passionate about AGI & algorithmic breakthroughs and experienced in distributed machine learning.

Languages Python, Java, C++, JavaScript, Rust, Ruby, Solidity

Tools PyTorch, TensorFlow, Docker, MCP, Linux, NumPy, Matplotlib, Git, Jupyter Notebook, React.js, Node.js, Conda, Bash, Gradle, MongoDB, TensorBoard

Technical Skills Distributed training, RAG, HPC, Hyperparameter tuning, Google Cloud AI platform, Smart Contracts, Computer Vision, LLMs, Autoencoders, Agile

EDUCATION

University of Sheffield

England, UK (Sep 2023 - Present)

- BSc Computer Science (Artificial Intelligence), full scholarship
- Grade: 74% (1st Class Honours)

Taras Shevchenko National University of Kyiv

Ukraine (Sep 2020 - May 2022)

- BSc Physics (discontinued)
- Grade: 93%

Online Certifications

Coursera & Others

- Deep Learning specialization, DeepLearning.AI
- Machine Learning, Stanford University
- Blockchain specialization, University at Buffalo
- Python for Everybody specialization, University of Michigan

EXPERIENCE

University of Cambridge

Student Researcher, Applied ML

England, UK (Jul 2023 - Present)

- Developing **Scanalyser** - a library and scripts for ML models training and inference on an HPC cluster
- Improved model's training and inference time by at least 10 times via hyperparameter tuning and changing the architecture without decreasing performance
- Performing distributed training on the GPU cluster via a custom training loop that leverages computational graph and other optimisations

The Innovation Game

Computational Scientist

England, UK (Aug 2024 - June 2025)

- Performing AI research regarding reinforcement learning (RL) on chain-of-thought (CoT) for self-improving reasoning agents.
- Conducted theoretical AI research for the ML Optimiser challenge which allows researchers to submit breakthrough optimisers and get financial reward. See the **announcement**.

Extreme Light Infrastructure, ELI Beamlines

Research Intern, Data Analysis

Prague, Czech Republic (Jul 2022 - Aug 2022)

- Conducted simulations on an HPC cluster to analyze the coherent radiation emission spectrum.
- Contributed to the **Coherent radiation of an electron bunch colliding with an intense laser pulse** paper via collecting the data.
- Provided theoretical physicists with data hints on the emerging theory via applying Fourier analysis techniques to analyze radiation measurement data. More on **GitHub**

COMPETITIONS AND PERSONAL PROJECTS

LLMxLaw Hackathon

King's College, University of Cambridge (Jul 2024)

- Developed a solution proposed by Google Cloud: Retrieval Augmented Generation (RAG) based LLM solution to help lawyers find critical points within contract negotiation using Vertex AI API and streamlit

Spad DeFi

(Dec 2022)

- Designed a decentralized application (dApp) on the Near Blockchain for randomly distributed reward stacking. More on **GitHub**

SELECTED AWARDS

- 3rd diploma, Ukrainian Programming Olympiad Regional stage (Feb 2018)
- 2nd diploma, Ukrainian Programming Olympiad City stage (Oct 2018)
- 35th nationwide, Ukrainian Physics Olympiad (Mar 2018)
- 17th nationwide, Ukrainian Physics Olympiad (Mar 2017)
- 1st overall in Kherson City, Ukrainian Physics Olympiad City Stage (4 consecutive years, 2016-2019)
